Session: 01

SUMMARY OF INFORMATION:

1. The general area is a land/structure interface at a high altitude. Water appears to be a minor part of the site.
2. Throughout the session, I was "stuck" and could not move from a spot where the land is jagged, steeply sloped in places and uneven. It has brown and shiny black rocks, and little vegetation. At the time of viewing, the air was clear, fresh, and cool. The weather was sunny and bright.
3. Off in the distance from where I was "stuck", there is an isolated structural complex surrounded by a wire (chain-link?) fence. It is multi-part, with many of the parts connected. One part is much higher than the others. The overall appearance is of metallic grey construction with "plain" sides (either no windows or all windows - no square window patterns breaking up the plainness). This complex appears to serve a scientific purpose, doing research/observing/"keeping".
4. Due to the "being stuck" phenomenon (which has happened to me before), I requested 025 for a 2nd session on this target.

Patrician splendor for a star: Gina Lollobrigida fills her villa on the Via Appia Antica with classical art during a 20-year career as an actress, including roles in more than 50 films. "The Magdalene" by Bernardino Luini hangs over the mantel; a Rodin bronze graces a table. Here sorting photographs, Miss Lollobrigida pursues another hobby. "I find it even more enjoyable to work behind a camera," she says, "than in front of one."
